To whom it may concern,

My name is Luke Marshall. I am tired of the emotionally driven and unscientific responses on the fracking issue. Regulation is appropriate, but please make a reasoned, scientific supported decision on the matter.

All credible scientific inquiries have arrived at the same conclusion: fracking can be carried out safely if regulated appropriately. The impact on human health and the environment are 'negligible'.

I urge the Panel to adopt a factual and evidence based approach to regulation on the use of hydraulic fracturing.

Yours sincerely,

Luke Marshall
