**Please provide more details:**

Sir, I am a senior member of my local community and I can't express my dismay and utter frustration at that fact that you are considering allowing Fracking to go ahead in the NT. I understand the financial difficulties that we face but to even consider that this will solve the problems and not consider the repercussions that fracking will do to our pristine environment just makes no sense. I am frightened for my future, my grandchildren's future and the Territory's future. I voted for you because you at least said there would be a moratorium on fracking. I trusted you as did the majority of Territorians. It seems instead of staying true to your word, you are selling out. Should fracking go ahead I will invite you to Mataranka for morning tea to discuss it, but I will suggest that you bring your own water, because I doubt you will be able to drink mine. Please, please reconsider this action. Don't go down in the NT's history as the Chief Minister who sold out. Take a strong stand and protect the NT.
